FIG. 230

V-Bottom Adjustable Clevis Hanger

SERVICE: For the suspension of flexible pipe, tubing or hose. Hanger must be used

in conjunction with FIG. #235 V-Channel. V-Channel must be cut to allow installation of fittings and couplings. FIG. #230 V-Bottom Adjustable Clevis Hangers must be installed at the end of the run of V-channel. Vertical adjustment of the supporting system is provided by the clevis top.

Upper nut must be tightened after the piping system is leveled.

MATERIAL: Carbon Steel

FINISH: Electro-Galvanized

ORDERING: Specify figure number and pipe size. (FIG. #235 V-Channel must be

ordered separately.)
